Education

AISSMS Institute of Information Technology
Bachelor of Technology in Computer Science Engineering

Pune, Maharashtra
Aug 2024 – May 2028

Technical Skills

Programming Languages: Python, C, C++, JavaScript, HTML, CSS, React

AI/ML: Machine Learning, Deep Learning, LLMs, LangChain, LangGraph, RAG, Vector Databases

Data Science: Pandas, NumPy, Tableau, Data Visualization

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Streamlit, AWS, GCP

Experience

GirlScript Summer of Code
Open Source Contributor

Remote
Mar 2026

- Contributed to open-source projects by fixing issues, improving features, and collaborating with developers using Git and GitHub.
- Worked on debugging, documentation enhancement, and code optimization in collaborative development environments.

Edunet Foundation
AI/ML Intern

Remote
Jun 2025 – Jul 2025

- Implemented machine learning algorithms using Python, TensorFlow, Keras, and Scikit-learn.
- Performed data preprocessing, feature engineering, and model evaluation on real-world datasets.
- Built Streamlit dashboards for prediction visualization and sentiment analysis applications.

Prodigy InfoTech
Data Science Intern

Remote
Jul 2025 – Aug 2025

- Conducted exploratory data analysis, preprocessing, and visualization using Python libraries.
- Identified trends and correlations through statistical and visualization techniques.
- Evaluated machine learning models using accuracy, precision, recall, and F1-score metrics.

Projects

AI Research Agent
Python, LangGraph, LangChain, Streamlit

May 2026

- Developed an AI-powered research automation system with graph-based workflows and document generation capabilities.
- Integrated LangChain and LangGraph for intelligent information retrieval and summarization workflows.
- Built an interactive Streamlit interface for real-time research interaction and automated report generation.

Agentic Blog Generation System
Next.js, FastAPI, LangGraph, Firebase

Apr 2026

- Built an AI-driven application to generate structured and SEO-friendly blog posts automatically.
- Designed a responsive frontend using Next.js and Tailwind CSS with Firebase authentication.
- Developed a FastAPI backend powered by LangGraph workflows and Groq LLM integration.

AI-Powered Auto Interview System
Python, LangChain, RAG, Streamlit

Apr 2026

- Created an intelligent interview simulation platform for technical and behavioral assessments.
- Implemented speech transcription, response evaluation, and communication analysis using LLMs.
- Built personalized interview workflows with automated question generation and response analysis.

Web Summarizer Application

Python, LangChain, RAG, Streamlit

Dec 2025

- Developed a web-based summarization tool using LangChain and Groq LLMs.
- Implemented Retrieval-Augmented Generation pipelines with embeddings and vector databases.
- Designed an interactive Streamlit interface for document and webpage summarization.

Relevant Coursework

Artificial Intelligence | Machine Learning | Data Structures and Algorithms | Frontend Development | LangChain and Lang-Graph | LLM and RAG Applications

Achievements

- Winner of 1 Hackathon competition by developing innovative AI-based solutions in a collaborative team environment.
- Participated in 8+ hackathons focused on AI, Machine Learning, Web Development, and Open Source technologies.

Languages

English, Hindi, Marathi
